Professional Summary

Backend and Data Engineer with experience building scalable SaaS platforms, data pipelines, and multi-tenant architectures. Specialized in integrating external APIs, processing large datasets, and developing data-driven systems for business intelligence.
Experienced in designing secure, high-performance backend systems using modern technologies, and applying AI-based scoring models to generate actionable insights from complex data sources

Education

Technological University of Torreón — Torreon, Coahuila
Engineering in Software Development and Management — 2024 – Apr 2026

Technological University of Torreón — Torreon, Coahuila
TSU in Software Development — 2022 - 2024

CONALEP — Torreon, Coahuila
Technical Accounting — 2019 - 2021

Experience

Silverstone Technology Group
Software Developer – Lead Developer (Magpie in Blue) — Apr 2025

Lead developer of *Magpie in Blue*, a SaaS platform focused on construction permit intelligence, contractor analytics, and commercial opportunity detection for HVAC distributors.
Key contributions:

- Designed and implemented a **multi-tenant architecture** using Supabase and PostgreSQL with Row-Level Security (RLS)
- Built **data ingestion pipelines** processing large volumes of U.S. construction permit data
- Integrated multiple external APIs including **Epicor Eclipse, Shovels, and ZipcodeAPI**
- Developed **AI-based opportunity scoring models** using Claude AI
- Designed contractor intelligence models based on historical and enriched datasets
- Implemented **API cost monitoring and control systems** to optimize external service usage
- Developed backend services using **Next.js and TypeScript**
- Generated analytical datasets for business intelligence and reporting

Technologies:
Next.js, TypeScript, Supabase, PostgreSQL, Claude AI, REST APIs, Shovels API, ZipcodeAPI.

Nexus Platform – Silverstone Technology Group
Full-Stack Developer

Development of internal platforms integrating enterprise data sources.

- Built web modules using **Angular and Django**.

Technologies: Angular, Django, MySQL

Clayens NP **2024 – March 2025**

Software Developer

Developed *SPCM (Sistema de Parámetros Clayens México)*, an internal system for managing operational parameters in manufacturing.

- Designed and implemented the full system architecture
- Deployed and maintained applications on **Linux (Debian) servers**
- Provided ongoing technical support and system maintenance

Technologies: Angular, Django, Linux (Debian).

Mayan GPS (Internship) **Jan 2024 – Ago 2024**

Web Platform Support

- Developed dashboards using **Angular and Node.js**.
- Improved system performance by **25% through NoSQL database optimization**.
- Maintained backend services and system stability.

Technologies: Angular, Node.js, NoSQL databases(Mongo DB).

Skills

Core Stack

- TypeScript, Node.js, Next.js, PostgreSQL, Supabase

Backend & Data

- Node.js, Django, Laravel, Adonis, Next.js(App router), Flask

Additional Backend Experience

- C#, .NET (basic to intermediate, academic and support experience)

Frontend

- React, Next.js, Angular, Vite

Mobile

- Android (Java), Ionic Framework

Infrastructure

- Linux, Nginx, Docker, Vercel, AWS, DigitalOcean

Databases

- PostgreSQL, MySQL, SQL Server, MongoDB

Languages

- Spanish — Native
- English — B1
